SUMMARY

I am a software developer with 5 years of experience in the field. As a person, I am great at collaborating, working as a **team player** and a very **open-minded person**. Besides developing websites, I have experience on working with **UI/UX** teams for design, handling **SEO optimizations** and communicating with customers. I have experience in many fields (banking, consulting, digitalization) and many markets (Turkey, Denmark, Germany, Sweden).

SKILLS

- JavaScript, jQuery
- React, Redux
- Node Js
- Google Console and AWS
- Detail Oriented
- Good communication
- Problem solving (engineering)
- Attention to detail

EDUCATION

Bachelor's Degree in Computer Engineering
Istanbul Technical University • 2016 – 2021

WORK EXPERIENCE

Accenture, Istanbul, Turkey
Senior Software Developer • December 2024 - Present

- *I am developing dashboards by using **AWS services** for our customer's internal website. The project is using IaaS structure and the technologies that we are using are **NodeJS, Angular, Docker, Terraform**.*
- *We are using **Glue Jobs, S3, Athena, Lambda, Auth** and more AWS services to have everything in cloud in our project.*

Hesehus A/S, Odense, Denmark
Frontend Developer • July 2022 - December 2024

- *I am helping our customers to get better **SEO results**, have to them **user friendly** and **accessible** pages, **high quality** and **sustainable** software in technical development.*
- *By considering the budget and scope of project, I am helping customer to **determine roadmap** for upcoming times, to **analyze the current problems**, to find **good solutions** for requirements for needs.*
